

DAST Expert

Service Specific Terms

DAST Expert is a specialized offering that helps organizations analyze application security scanning results to eliminate false positives. This service allows companies to prioritize real security issues more effectively by providing expert analysis and guidance. By reducing the noise from automated vulnerability scans, DAST Expert aids in correctly identifying genuine vulnerabilities, streamlining collaboration between security and development teams, and ensuring that critical issues are addressed efficiently. This service is supported by a team of ethical hackers with proven expertise in cybersecurity.

DAST Expert is made available to the Customer as an annual subscription, contingent on the number of applications tested.
