

# Managed Services

Maximize Security Investment with Managed Threat Exposure Management

Our Managed Security Services provide comprehensive coverage across your network, endpoints, applications, and clouds, ensuring optimal cyber hygiene. Recognizing the uniqueness of each organization, we adopt a journey-based approach tailored to your specific needs. Our dedicated team works closely with your stakeholders to customize scopes and schedule assessments, ensuring timely and relevant reporting. As your trusted partner, we prioritize your security and success, helping you stay ahead of threats and focus on your core business objectives.

## Managed Solutions:

**Digital Risk Protection:** Expert guidance and advice on detected threats tailored to your organization's configured modules and scopes.

**External Attack Surface Management (EASM):** In-depth insights into your external attack surface and advice to improve your security hygiene and reduce exposure. Our EASM Advanced\* service provides advice and recommendations on further testing on newly discovered assets.

**Risk-Based Vulnerability Management:** Comprehensive monitoring of both external and internal vulnerabilities, offering valuable insights to enhance your security posture.

**Application & API Security:** Fully managed application and API security with expert analysis of vulnerabilities to help prioritize remediation efforts and maximize productivity.

**PCI:** We analyze and report on results of non-compliance from our PCI scanning solution.

**Compliance:** Detection and analysis of non-compliant findings, and assessment of both on-premise and cloud against compliance benchmarks.

**Takedowns:** Protect your brand and identity through our website take down service.

\*EASM Advanced delivered as an add on to Managed EASM.

## Key Use Cases

### Enhanced Security Monitoring

We track and monitor your digital footprint and identify hidden vulnerabilities, saving you valuable time and resources.

### Access to Highly Skilled Experts

Eliminate the need for costly recruitment and training with direct access to highly skilled experts, reducing expenses while increasing efficiency.

### Rapid Deployment and Increased Maturity

Leverage our expertise and resources to quickly deploy robust security measures

### Comprehensive Reporting

Custom Risk-Based Reporting with predefined criteria to fit your KPI's and SLA'S.

*"By investing in a managed vulnerability management service from Outpost24 we've achieved greater visibility on external threats through the daily vulnerability checks on our external networks. Outpost24 is invaluable to our business, providing the biggest source of information in relation to the dangerous outside world."*

Carlo Werbrouck  
Chief Information Security Officer  
P&V

# Managed Services

Enhance your security strategy by pairing the Outpost24 Exposure Management Platform and solutions with our Managed Service, designed to maximize your investment and drive effective security programs.

## Key Offerings:

### Maintenance Services

We maintain and manage your solutions including onboarding of scopes and configuration.

### Reporting

Automated and in-depth reporting delivered via a secure role-based controlled library and PowerBI dashboard.

### Proactive Alerting

Customized alerting ensuring effective communication and triage to meet your needs.

### Forum Sessions

We provide support and guidance on remediation actions to keep you on track and boost your security maturity.

## Professional Service

Boost security maturity programs with expert advice and guidance from our Professional Services team.

### Expert Deployment

Specialist guidance and advice on scoping, configuration, and deployment of Outpost24 solutions to suit your needs and drive ROI.

### Consultancy Days

Maximize your security potential by consulting with our experts to learn best practices and effective management strategies.

### Security Assessment

Identify and address vulnerabilities within scope by performing a cyber security assessment, enhancing your organization's overall security posture.

\*Professional Services delivered as a time-based add on to Managed Services.

## Embarking on or Re-energizing a CTEM program?

Outpost24 solutions enable organizations to achieve Continuous Threat Exposure Management.

By 2026, organizations that prioritize investments based on a CTEM program will be 3x less likely to suffer a breach (Gartner).
